All UF employees and students must adhere to UF's sexual harassment policy which can be found here: <https://hr.ufl.edu/forms-policies/policies-managers/sexual-harassment/>. The lectures and the readings from the textbooks listed below define the full syllabus of this course. Certain sections of the textbooks that are not examinable are identified in class. Another reason to come to class. ☺

Policy for Disputing a Grade

You will have one week (including weekends and holidays) after any course material grade has been posted to dispute your grade. The exception will be the LAST exam because there won't be enough time to complete disputes and turn grades in. Disputes will NOT be accepted after that date. If you want to dispute a grade you will need to write a paragraph explaining the dispute. For exams/quizzes, write out the question on the quiz and a paragraph explaining why your answer is correct with references to the material in the text for each question

or writing assignment you are disputing. Then send a private email with this information to the instructor's e-mail address.

Honor Code

I am not willing to give a passing grade to those who do not abide by the UF honor code. Any student who cheats or helps another student cheat will receive an E (Fail) in this class. When students enroll at the university, they commit themselves to the standard drafted and enacted by students.

Preamble: In adopting this honor code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the university community. Students who enroll at the university commit to holding themselves and their peers to the high standard of honor required by the honor code. Any individual who becomes aware of a violation of the honor code is bound by honor to take corrective action. The quality of a University of Florida education is dependent upon community acceptance and enforcement of the honor code.

Honor Pledge: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied:

"On my honor, I have neither given nor received unauthorized aid in doing this assignment."

It should be clear that academic dishonesty, such as cheating, is NOT tolerated at the University of Florida. Cheating is defined in the University Handbook, and it is the student's responsibility to be familiar with its many forms (including plagiarism). If there is a suspected academic honesty violation, the Student Honor Code Procedures will be followed.

STUDY SKILLS

This class covers a large amount of material and it is crucial for students to keep up with the reading and study regularly. The MOST IMPORTANT study habits are 1) read the material when it is assigned, 2) read and study the text before and after hearing the lectures on those topics, and 3) study and test yourself in-depth on the days before each exam.

It is very important to read the assigned text by the due date on the syllabus. This reading will provide you with some basic knowledge for each topic, to help you to understand the material more fully when you hear the lectures. A day or two after each lecture, read back over your notes to make sure that you understand everything you have written. Be certain, for example, that you can find a definition in your notes for each new term that was presented in class. Class attendance is not required. However, if you are having difficulty with the material, or if you are not performing as well as you want on exams, you should do the following: attend class EVERY TIME, pay close attention to the lecture, review the terms and alternative hypotheses sections in order to focus your reading, and use good note-taking skills.

Your text is well organized. Important terms are defined separately in the text. Always read the chapter summary and try to answer the questions in the text. Use the text headers to help you identify main ideas, and take note of any definitions in the text. Compare these to the definitions received in class.

You can improve your knowledge and your test scores by reviewing all available learning materials and online resources provided for your text. If a term is not listed there, you do not need to know its meaning for the quiz.

If a term is listed there, you should be prepared to answer any question about that concept from class or the book. In addition, I will periodically post a copy of lecture slides on the website after the lectures are completed.

Everyone has a different preferred way of studying. Some students find that outlining the text or rewriting class notes is a good way to study. Others find that flash cards are a good study aid -- they put an important term on one side of the card and put its definition on the other side, maybe with an example (make up your own example if you can). You may benefit from rewriting ideas in your own words, or it may help you to study aloud, defining terms, and explaining theories to a "study buddy." Complete all of the "Complete Review Systems" available in your textbook before the exam.

It doesn't matter which method works best for you -- the important thing is to study and be involved in studying over a period of time. Don't try to cram it all in at the last minute. There will be no worksheets or homework assignments to ensure that you start reading the material early. You will have to take the initiative yourself to get started right away.

REMEMBER! The most important study habits are 1) read all assigned pages by the date they are assigned; 2) read and study the text before and after hearing the lectures on those topics, and 3) study and test yourself in-depth on the days before each exam, using the "terms and alternative hypotheses" sections, and all available review sections at the end of each chapter.
